# Configuration of Management Module on Coral ERM

After installing CORAL ERM. There is chance to get an error while using Management module.

Find the location of configuration.ini file in Management Module and remove access to Management Database. To do same follow the steps:

Open Terminal in ubuntu.

Run the command

sudo nano /var/www/html/management/admin/configuration.ini

Text editor will open.

Find line with

' organizationsModule = "Y"'

Configuration of Management Module on Coral ERM

```
coral@ubuntu: ~
  GNU nano 4.8                        /var/www/html/management/admin/configuration.ini
[settings]
authModule = "Y"
authDatabaseName = "coral_auth"
licensingModule = "Y"
licensingDatabaseName = "coral_licensing"
managementModule = "Y"
managementDatabaseName = "coral_management"
organizationsModule = "Y"
organizationsDatabaseName = "coral_organizations"
reportsModule = "Y"
reportsDatabaseName = "coral_reports"
resourcesModule = "Y"
resourcesDatabaseName = "coral_resources"
usageModule = "Y"
usageDatabaseName = "coral_usage"
```

Change the permission to "N" and save

'organizationsModule = "N"'

```
coral@ubuntu: ~
  GNU nano 4.8                        /var/www/html/management/admin/configuration.ini
[settings]
authModule = "Y"
authDatabaseName = "coral_auth"
licensingModule = "Y"
licensingDatabaseName = "coral_licensing"
managementModule = "Y"
managementDatabaseName = "coral_management"
organizationsModule = "N"
organizationsDatabaseName = "coral_organizations"
reportsModule = "Y"
reportsDatabaseName = "coral_reports"
resourcesModule = "Y"
resourcesDatabaseName = "coral_resources"
usageModule = "Y"
usageDatabaseName = "coral_usage"
```

Then Save and Exit.

Now go to management module on CORAL ERM web interface and refresh the page and click on "New Document"

Now adding of new categories option is available.
